EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Teddy C. Scott on 12/9/09.

Rewrite claims 31 and 36 as follows:

31. (Currently Amended) A vector comprising ~~a heterologous sequence, wherein the heterologous sequence is selected from the group consisting of~~ an isolated nucleic acid, wherein the sequence of the nucleic acid consists of:

(a) SEQ ID NO: 4204050;

(b) a DNA encoding (a), wherein the DNA is identical in length to (a); ~~and~~ or

(c) a complement of (a) or (b), wherein the complement is identical in length to the nucleic acid of (a) or (b).

36. (Currently Amended) A vector comprising ~~a heterologous sequence, wherein the heterologous sequence is selected from the group consisting of~~ an isolated nucleic acid, wherein the sequence of the nucleic acid consists of:

(a) SEQ ID NO: 117937;

- (b) a DNA encoding (a), wherein the DNA is identical in length to (a); ~~and~~ or
- (c) a complement of (a) or (b), wherein the complement is identical in length to the nucleic acid of (a) or (b).

Reasons For Allowance

The following is an examiner's statement of reasons for allowance.

The rejection of claims 31 and 36 under 35 USC 102(b) over Ghazal is withdrawn in view of the amendment requiring that the vector must comprise an "isolated nucleic acid". The instant specification makes clear at paragraph 47 that an "isolated nucleic acid" is defined as a nucleic acid that is free of the genome of the organism from which the nucleic acid is derived, and includes, for example, a recombinant nucleic acid which is incorporated into a vector, into an autonomously replicating plasmid or virus. Thus one of skill reading the specification and claims would understand that claims 31 and 36 do not read on a vector comprising the entire CMV genome as disclosed by Ghazal, or on vectors that comprise the recited SEQ ID NOS: flanked by sequences that naturally flank them in the CMV genome.

The obviousness rejections of claims 26 and 33, and of claims 35 and 37 are withdrawn after further consideration and in view of Applicant's arguments. The claims were rejected as being obvious over probes or primers directed to the CMV genome. Applicant has argued that a role of these sequences as miRNAs would represent a secondary consideration and would be indicative of non-obviousness. In view of

Murphy (2008, of record), one of skill would appreciate that the claimed nucleic acids could function as a pre-miRNA or an miRNA. Although the Murphy reference demonstrates target sequences other than those set forth in the instant application, and does not set forth the target sequences disclosed in the instant specification, this does not mean that the instantly disclosed target sequences will not be recognized by the claimed sequences acting as miRNAs. In other words, the Murphy reference does not constitute evidence that one could not use the claimed invention as envisioned in the specification. The specification as filed positively asserts that the claimed SEQ ID NOS: are expressed sequences, and that they target CMV RNAs as miRNAs. There is no evidence of record that this does not occur. Absent such evidence, the positive assertion that the claimed sequences act as a pre-miRNA or miRNA is sufficient to serve as a in indicia of non-obviousness with regard to the rejections of the claims as obvious over probes or primers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
